Digital Transformation

How can I use JAMF at home to help my child learn how to navigate the digital world?

The Digital World

More 3-4, 5-7s and 8-11s are online than in 2016, with increases of more than ten percentage points for the youngest two age groups. As a consequence, [redacted] of 3-4s are now online, as are [redacted] of 5-7s and [redacted] of 8-11s. [redacted] per cent of 12-15s are also online, unchanged since last year.

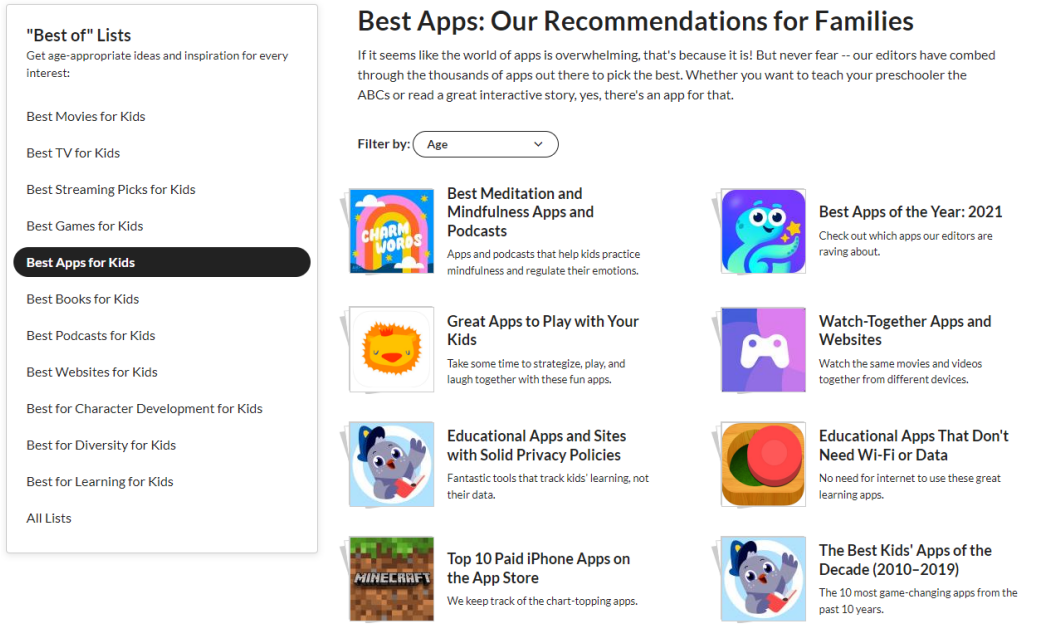
A quarter of 8-11s and three-quarters of 12-15s have a profile on a social media or messaging site or app. No 3-4s, and 3% of 5-7s, have a profile.

Seventeen per cent of 8-11s and 29% of 12-15s who go online say they have ever seen something online that they found worrying or nasty. Nearly all 8-11s (95%) and nine in ten 12-15s (90%) say they would tell someone if they saw this kind of content, with this most likely to be a family member. This is unchanged since last year for 8-11s but is less likely for 12-15s (90% vs. 94%).

What can I use my child's iPad for?

- Apps that are age appropriate can be downloaded
- Online homework, we will not be increasing the quantity of online homework
- Establish boundaries as a family, involve your child in this discussion
- Apps downloaded or settings changed will disappear once your child enters onto school premises with their iPads

App Reviews, Kids Apps | Common Sense Media



What is JAMF?

- JAMF helps empower parents and teachers to teach children about the digital world

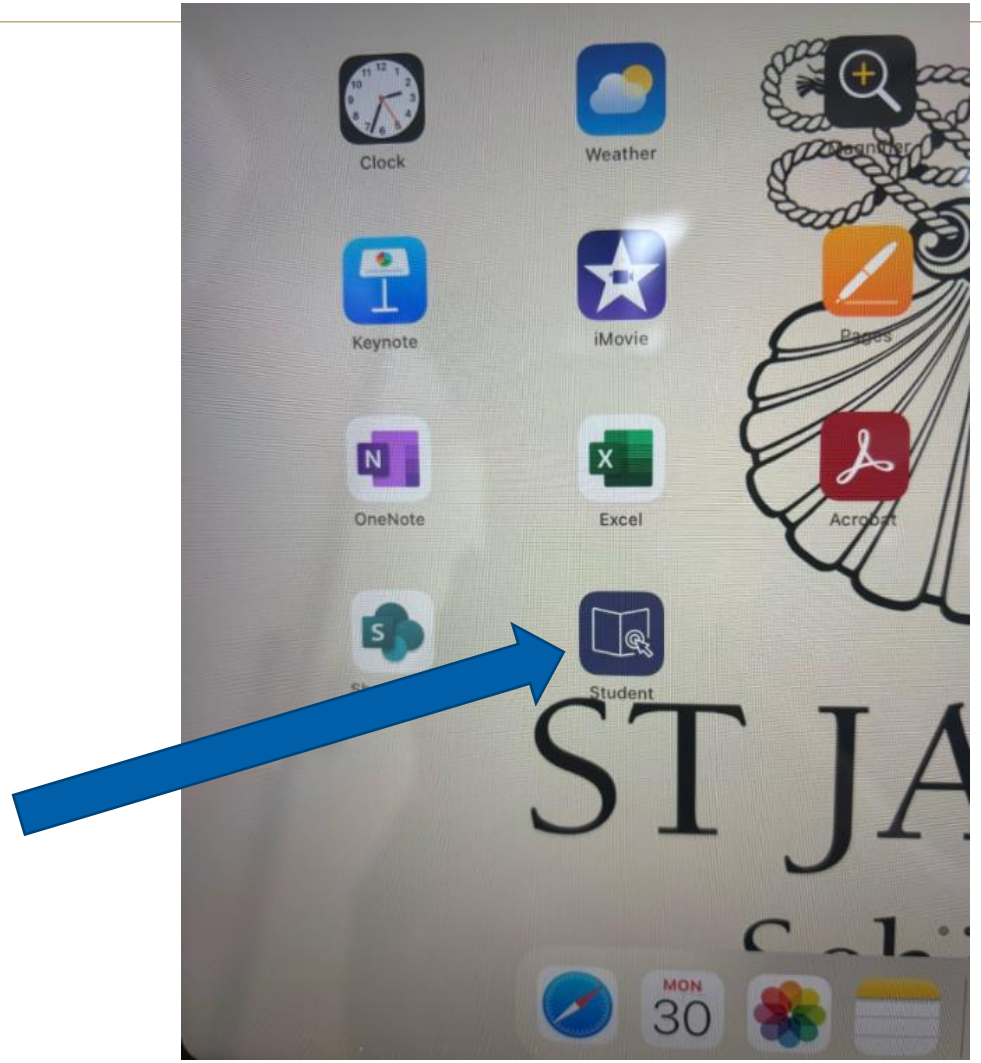
- Parents and teachers can restrict and schedule device and app use

Jamf Parent Guide for Parents | Jamf

JAMF

- Please download JAMF parent from the Apple or Android app store on your mobile device

Take your child's iPad and find the JAMF student app



Click on your child’s name

Scan the QR code displayed using the parent app
